

SEACHERS

The name of the project ...

SEACHERS

... is a blend of two words: SEA and TEACHERS.
This is because the project is about broadly
understood sailing education offered by SEAsoned
trainers and instructors.

Who?

I know...

- ... that sailing courses can be innovative and integrated with training in other areas;
- ... that sailing theory – like anything else – can be learned with the use of new technologies;
- ... ICT flattens hierarchies and shortens the distance between you and those who you want to learn sailing with.

What
?

The *SEARCHERS* projects

- link sailing with training in other areas because in good education everyone is always on the crest of the wave
- are carried out as traditional, blended and distance education
- are open to all things new: new techniques, new people, new solutions

The *SEACHERS* e-learning platform

- gives access to online courses in various areas of sailing knowledge and skills;
- gives access to individual materials as well as rich structures resources;
- makes it possible to get in touch with experienced seachers and start a MASTERCLASS under their supervision;
- broadcasts webinars with seasoned sailors
- has functions for the creation of communities of practice.
